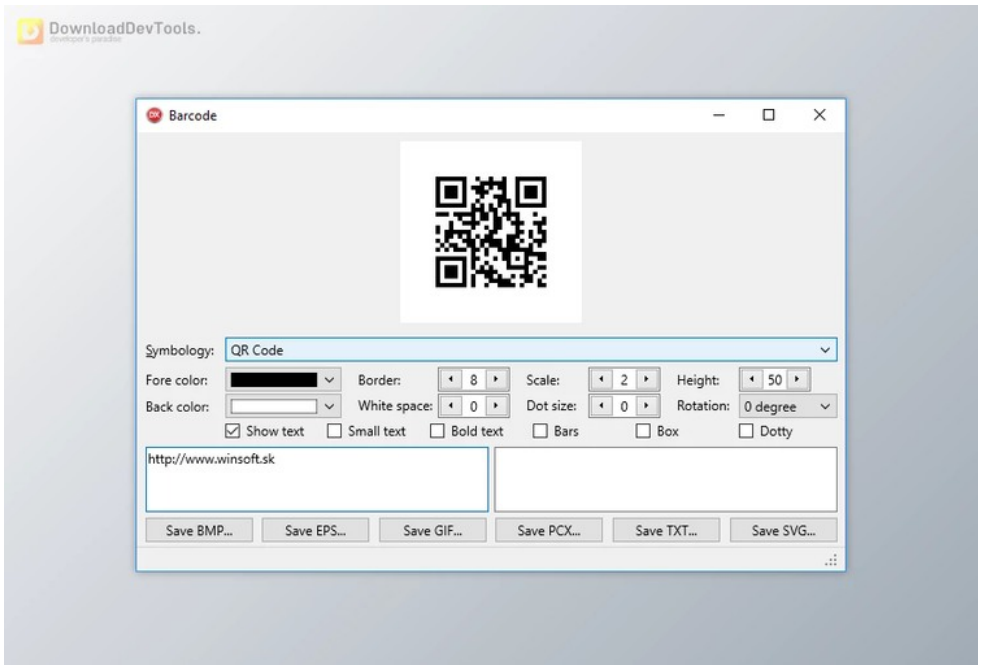
Winsoft Barcode for FireMonkey v8.7 for Delphi & CB XE2-12 Athens Full Source

2026-09-10 11:00:48



Winsoft Barcode for FireMonkey is a comprehensive barcode generation and scanning solution tailored for Delphi developers utilizing the FireMonkey framework. This innovative toolkit empowers developers to integrate barcode functionality into their cross-platform applications, allowing for efficient data capture, identification, and management. With Winsoft Barcode, Delphi developers can effortlessly enhance their applications with the power of barcode technology, catering to a wide range of industries and use cases.

Cross-Platform Compatibility: One of the standout features of **Winsoft Barcode for FireMonkey** is its cross-platform compatibility, supporting the FireMonkey framework to enable the creation of applications that run seamlessly across different platforms. Whether targeting Windows, macOS, iOS, or Android, developers can leverage Winsoft Barcode to consistently incorporate barcode generation and scanning functionality, ensuring a unified user experience across diverse devices and operating systems.

Barcode Generation Capabilities: Winsoft Barcode for FireMonkey provides robust capabilities for generating various barcode types, including QR codes, Code 128, UPC-A, and many more. Developers can easily customize the appearance and content of generated barcodes, tailoring them to specific application requirements. This feature-rich toolkit supports the creation of static and dynamic barcodes, opening up possibilities for dynamic data encoding and decoding within Delphi applications.

Effortless Barcode Scanning: Facilitating seamless integration of barcode scanning capabilities, **Winsoft Barcode for FireMonkey** enables developers to build applications that can efficiently capture and process barcode data. With support for camera-based and image-based scanning, developers can create versatile solutions for inventory management, point-of-sale systems, and various other scenarios where quick and accurate barcode scanning is crucial.

User-Friendly Integration and Customization: Winsoft Barcode for FireMonkey prioritizes developer ease of use,

FireMonkey Delphi Components

providing a user-friendly API and detailed documentation for straightforward integration into Delphi applications. Developers can easily customize the appearance and behavior of the barcode components, adapting them to the application's design language. This level of flexibility empowers developers to create visually appealing and highly functional barcode solutions tailored to the specific needs of their projects.

In conclusion, is a valuable asset for Delphi developers seeking to incorporate barcode functionality into their cross-platform applications. With compatibility across different devices and operating systems, versatile barcode generation capabilities, and seamless integration, Winsoft Barcode simplifies leveraging barcode technology in diverse application scenarios.

Key Features of **Winsoft Barcode for FireMonkey**:

1. **Cross-Platform Compatibility:** Winsoft Barcode supports the FireMonkey framework, allowing developers to create applications that seamlessly run on various platforms, including Windows, macOS, iOS, and Android.
2. **Versatile Barcode Generation:** The toolkit supports various barcode types, including QR codes, Code 128, UPC-A, EAN-13, and more. Developers can generate static or dynamic barcodes, tailoring them to specific application requirements.
3. **Customizable Appearance:** Winsoft Barcode allows developers to customize the appearance of generated barcodes, including size, color, and other visual aspects. This feature enables developers to integrate barcodes that align with the overall design language of their applications.
4. **Dynamic Data Encoding and Decoding:** With support for dynamic data encoding and decoding, developers can create applications that generate and interpret barcodes based on changing data, enhancing flexibility in various scenarios.
5. **Efficient Barcode Scanning:** The toolkit facilitates scanning using camera- and image-based methods. This capability is essential for applications requiring efficient and accurate barcode data capture, such as inventory management and point-of-sale systems.
6. **Cross-Device Camera Support:** Winsoft Barcode supports using device cameras for barcode scanning, providing a consistent and user-friendly experience across different devices.
7. **Detailed Documentation:** The toolkit comes with comprehensive documentation, ensuring developers have the necessary resources for easy integration and optimal use of Winsoft Barcode for FireMonkey.
8. **User-Friendly API:** Winsoft Barcode is designed with a user-friendly API, simplifying the integration process for Delphi developers. The intuitive programming interface allows for efficient utilization of barcode functionality within applications.
9. **Integration Flexibility:** Developers can seamlessly integrate barcode components into their FireMonkey applications, adapting them to specific use cases. This flexibility enables the creation of highly customized and specialized barcode solutions.
10. **Multi-Device Deployment:** Winsoft Barcode supports deploying applications on multiple devices, allowing developers to reach a broader audience and address diverse user requirements.

Delphi and C++ Builder barcode component for FireMonkey.

- uses Zint Barcode Generator
- supports over 50 symbologies, including Code 128, Data Matrix, USPS OneCode, EAN-128, UPC/EAN, ITF, QR Code, Code 16k, PDF417, MicroPDF417, LOGMARS, Maxicode, GS1 DataBar, Aztec, Composite Symbols, Ultracode and more
- supports Windows, macOS, Linux, iOS and Android
- available for Delphi/C++ Builder XE2 - 12
- source code included in the registered version
- royalty-free distribution in applications
