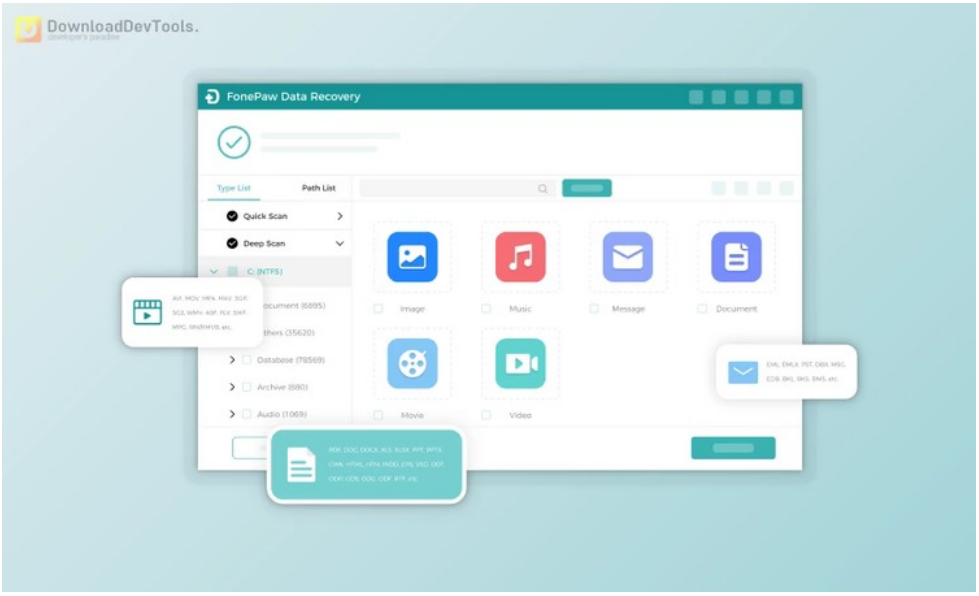
FonePaw Data Recovery v3.5.2 for Win x64 & macOS

2025-04-16 13:14:08



FonePaw Data Recovery offers a comprehensive solution for retrieving lost data from various storage devices, including laptops, PCs, memory cards, USB drives, HDDs, SSDs, and more. With the ability to recover over 1000 file types while maintaining original quality, it efficiently handles data loss scenarios such as accidental deletion, system crashes, partition issues, virus infections, and formatted drives.

The software features two scan modes—quick and deep—to expedite the restoration process based on user requirements. It covers many data recovery situations, including deleted files, hard drive crashes, partition problems, memory card issues, virus attacks, formatted drives, recycle bin deletions, and raw file recovery. **FonePaw Data Recovery** supports various file formats, including office documents, archives, photos, emails, videos, browsing data, audio files, and more, ensuring comprehensive data retrieval.

Compatible with Windows and Mac operating systems, supports multiple file systems, including NTFS, exFAT, FAT16/FAT32, and APFS. It offers a user-friendly interface and supports multiple languages for ease of use. With just three simple steps—selecting file type and drive, previewing scan results, and choosing files to recover—users can efficiently restore their lost data with **FonePaw Data Recovery**.

Key Features of **FonePaw Data Recovery**:

1. Recovers data from various storage devices, including laptops, PCs, memory cards, USB drives, HDDs, and SSDs.
2. Supports recovery of over 1000 file types while maintaining original quality.
