

### Blender Market - AnimToolBox v0.0.6.3

2025-02-10 16:46:47   [label](#)   [我要反馈](#)   [下载页面](#)

**Blender Market - AnimToolBox** is an addon that enhances animation capabilities within Blender while making the entire process more efficient with the tools and workflows provided. Motion path, temp control, retime markers, and copy-paste matrices are editable features that are included. This addon is a non-linear filing system that makes rigging, motion editing, and keyframe editing easy as it can act as a temporary control rig, thus increasing the speed and quality of the edit afterwards. It is even more advanced as it improves system performance with hotkeys and a modern UI featuring coloured icons. It is easy to do all advanced keyframe manipulations in control setups with bright bake focus, making this addon indispensable for Blender animators.

**Editable Motion Path:** Utilize bezier handles, manipulate keyframes, and enhance functionality. Zooming, scaling, rotating, and moving are easily performed on keyframes.

**Temp Controls:** Performed editing is easier while baking animations in temporary rigs such as World Space Ctrls, IK, FK Setups, and Smart Bake.

**Matrix Copy-Paste:** Preserves positioning and distance in animations by copying and pasting world and relative matrices between objects or bones.

**Temp Ctrls Switch:** Adjust the influence of temp controls on the original rig.

**Keyframe Offset:** Adaptive keyframe offsetting is ideal for workflows that aim to be non-destructive.

**Quick Bake:** Smart handoff controls for keyframes and interpolation allow the setup to be baked into the original rig when the temp control sets are removed.

**Sharekeys:** Enables animation blocking using shared keyframes for those who utilize multiple bones or objects.

**RiggerToolbox (Experimental):** Includes custom rig-creating tools such as chain controls and Bbones widgets.

**UI Enhancements:** We added coloured icons and quick access to options, improved the menu header, and enhanced work efficiency.
