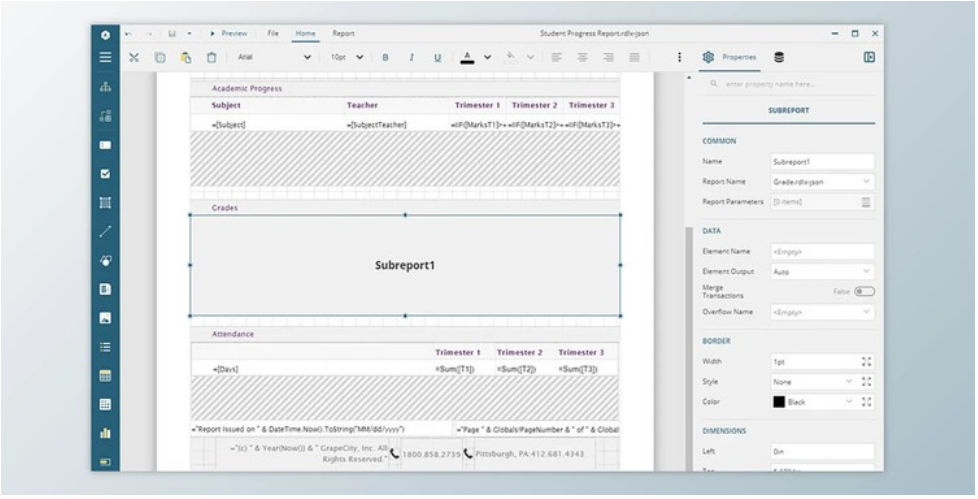
GrapeCity ActiveReportsJS v3.1.1 (27 Jun 2022) Designer

2025-03-23 01:09:13



JavaScript Reporting Option for Internet Applications

- Construct scalable reporting software
- Improved service for Angular, React, and Vue
- Incorporate ActiveReportsJS into software
  Utilizing popular JavaScript frameworks
- Permit reporting on the Customer
  without server dependencies
- Export reports to PDF, Excel, or HTML formats

High-Performance JavaScript Reporting Engine: leverage the strong reporting engine to load and then create your reports from JavaScript on almost any device.

Client-Side Exporting and Printing: Instantly generate WYSIWYG reports and export them to PDF or Excel on the client-side. Permit your end-users to publish JavaScript reports that are pixel-perfect.

Design Interactive JavaScript Reviews: Utilize the drill-down or drill-through works to give interactivity and much more specific info for end-users.

Reporting for almost any JavaScript Framework: Use ActiveReportsJS with virtually any popular JavaScript frame such as Angular, React, and Vue.

No External Dependencies: Composed in TypeScript. Execute in almost any internet application. Customizable and Simple to Use in VSCode.

Multiple Report Types: Pick from layout-driven page reports or info RDL accounts, developing a compilation report library.
