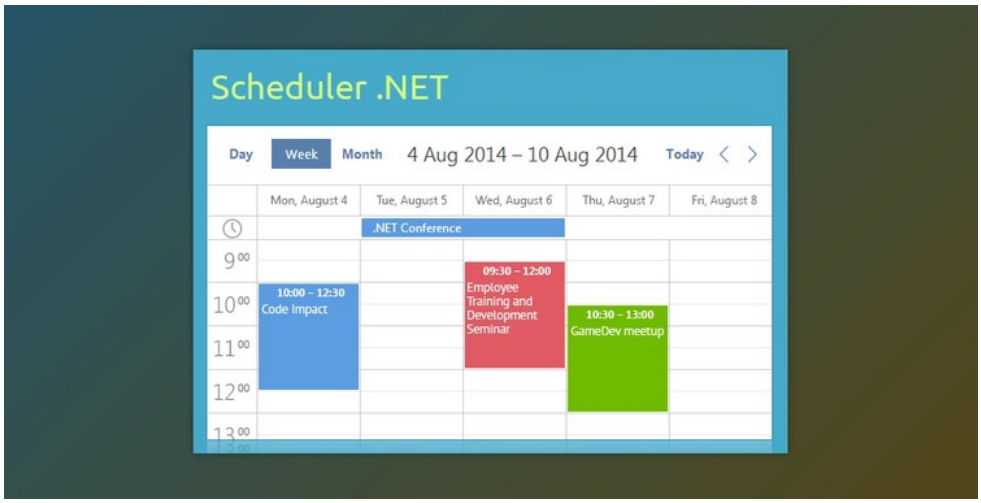
DHTMLX Scheduler .NET v4.0 Enterprise

2024-12-28 23:29:16



DHTMLX Scheduler .NET is a net control that offers loaded scheduling capabilities found in MS Outlook or Google Calendar, powered by easy Ajax loading and innovative drag-and-drop.

It is possible to personalize ASP.NET scheduler management and configure its behavior according to your program's requirements. It provides all required functionality to construct interactive and attractive scheduling alternatives such as ASP.NET, for example, Outlook-like event calendars, space booking calendars, auto rental software, job management systems, job schedulers, etc...

We maintain our web scheduler current and add new helpful features. We made it effortless to incorporate it into almost any ASP.NET MVC and WebForms program. Also, it can be synchronized with other calendars, such as Google or even Outlook.

DHTMLX Scheduler .NET Great Features:

Using DHTMLX Scheduler .NET, you can exhibit your occasions in the fundamental day, week, month, and year views, which is, in fact the crucial performance of virtually any event calendar. A useful date-picker can also be included.

You can have a weekly and daily schedule to exhibit all appointments and tasks you've got for the present week daily.

You can produce your ASP.NET calendar events that overlap in time. In this scenario, they're exhibited as cascades.

Together with DHTMLX Scheduler. NET, you can organize all of your information loaded from several sources in 1 grid. Filtering events by type can be offered.

Should you have to display events on your ASP.NET app for many tools (e.g., workers, office places, rooms), a deadline perspective is a superb alternative.

Should you have to exhibit several scheduler cases with various perspectives on a single page, you would need several scheduler functionalities.

Contain your Google Calendar occasions with DHTMLX Scheduler. NET through Google Calendar API to stay notified of events that are scheduled.

Contain your Outlook Calendar with Scheduler. NET and have your appointments and job imported/exported in a wink of an eye.

Should you have to find your events around the map, then incorporate Scheduler. NET using Google Maps and exhibit the place right in the calendar.

Should you will need to export your occasions to PDF or iCal, we included this feature in the ASP.NET scheduler for your own convenience.
