

Blender Market – Windy V1.0

2025-02-10 16:42:32 [label](#) [我要反馈](#) [下载页面](#)

Blender Market – Windy V1.0: Introducing Windy: an addon designed to seamlessly incorporate realistic wind effects into your scenes, eliminating the need for intricate parameter adjustments. With this tool, you can achieve instant and authentic wind effects without the hassle of tweaking numerous settings each time.

Supported Blender Versions: Compatible with the current Blender release and also works seamlessly with the upcoming Blender 4.0.

Installation:

- Navigate to Edit > Preferences.
- Choose "Install" and select the windy.zip file.
- Activate the addon.
- Find a new tab named "Windy" in the side panel, where all the tools are conveniently located.

Creating Wind: Easily add a wind system to your scene for instant and realistic wind simulations. The system is automatically placed at the location of the 3D cursor.

Deleting Windy: Effortlessly remove the entire wind system from your scene when needed.

Adjustable Parameters:

- Wind Strength: Control the intensity of the wind in your scene.
- Turbulence Strength: Manage the wind turbulence for a more dynamic effect.
- FreqZ Strength: Adjust the intensity of the wind and turbulence animation.
- FreqZ Scale: Control the speed of the wind and turbulence animation.

Presets: Save and organize multiple winds presets, allowing you to switch between them in real-time or create captivating wind animations effortlessly.

Experience the convenience of Windy, revolutionizing your workflow by providing instant and customizable wind effects in your Blender projects.
