Light Transitions 2.0 – The second version of the project for light transitions in Premiere Pro is now available in 4K. This project utilized fill light and realistic highlights to create atmospheric and volumetric light in the video. You still have the option to choose the color for the transition and bottom light. These transitions are perfect for bloggers, travelers, weddings, and slideshows. Video tutorial included. Light Transitions 2.0 allows you to create professional transitions in your videos. Light Transitions are included in the first version.
