Magicadabra Preset Pack – Education by Magic: Here it is. The one who will dominate the world. The one that brings back the color to life. Magicadabra preset. Wizard himself created it. This is me. This is the one I'm currently employing for all of my photography - weddings sessions, portraits, and even my pictures. It's vibrant, and it's of amazingness. The preset pack contains .xmp files that work with Lightroom Classic 7.3 (or higher) and Camera RAW.

The product is in **Lightroom category** , for more information about this post you can click on the home page link in the sidebar.

The pack comes with two presets and four tools:

- Presets:
- Magicadabra Color - this is the color I'm talking about constantly;
 - Magicadabra Black & White - the black and white preset is simple and packed with contrast.
- Tools:
- Magic POP – one-click adjustment created to work with images that don't have as much contrast to boost the colors in the photos shot with either some old-school lenses or some tilt-shift lenses;
 - Lens correction ON/OFF – a quick tool to turn on and off lens corrections with one click;
 - Magic Dust Grain ON/OFF – another super easy tool to quickly add grain to the image;
 - Magic Fade Slider – a super cool tool that adds a fade slider to give the image a unique, vintage look.
