It's very simple. I've made the product as simple to use as it is. This Photoshop Action is capable of transforming your photos into professional dark, energetic Flash lighting effects. A highly detailed result, with many options to customize and improve. The actions are specifically designed for graphic designers, photographers, and artists. Each time you use the action you'll get a different result even when you use the same brush area! You will get UNLIMITED numbers of effects! Once the action processing has been completed you will have complete control over the layer. You can take out the layers you don't like. you can change or move, scale or blur layers, and then create new components. You can also duplicate the entire parts folder and relocate the folder and transform it, then scale it, rotate it, blur it...

The action has been tested , and is running with Photoshop (English version) CS3, CS4, CS5, CS6, CC and CC2014, CC2015, CC2015.5,CC2017, CCC2018, CC2019, C2020, CC2021, CC2022+

If you're not using the English version it is possible to switch your Photoshop to English and play the image and then switch in the future.
