Components   Other   .Net
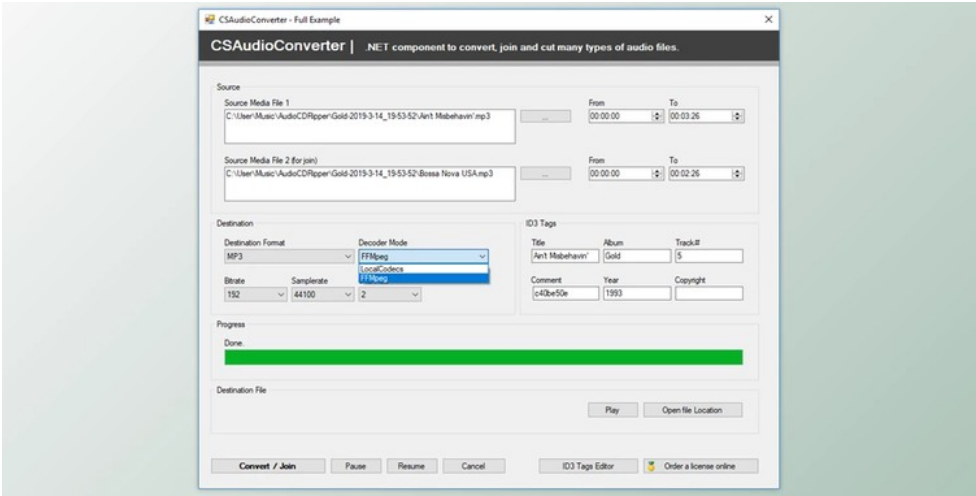

The CSAudio Converter is described to be a .NET Library which permits the users and the developer in order to convert different types of audio as well as video files to the AAC, APE, MP2, MP3, ACM WAV, PCM WAV, and finally the audio files of the C# and VB.NET. At the same time, it has the ability to allow the user and the developer in order to combine or even join along with cutting and splitting of the audio files, setting the destination of the audio formats such as samples, channels, and even bitrates and even permits the user as well as the developer to set and edit the tags of the ID3 of the files in the destination and a lot more in an easy and flexible manner with the help of a few lines of the source code. It permits the user to use the library from the languages of the C# and VB and any other language which has the ability to support the framework of the .NET and the .NET core platform. The .NET Library also has the ability to convert the sound files to the format of ACM WAV, VB .NET Length, and finally the .NET Center.

The benefits of the Microncode CSAudio Converter are stated as below:

- A .NET component.
- Can convert any audio as well as video files.
- It can convert the tracks of CDA and the audio CD.
- It has the ability to set the format such as mono or stereo.
- It can perform the process of splitting and cutting at the same time converting the length of the source file which is specific.
- It can perform the process of decoding with the local codecs that have been installed.
- It has the ability to decode with the libraries of the FFMpeg.
- It can run as a library.
- In this case, the user can't have a source code of the component which is available.
- It can be used as a product that is commercial.
- It is described to be having a license under the MS-PL.
- It is very safe to exist.
- It consists of a lot of relevant events.
- It is built in the handling of the threads.
