Surveys show that people only spend two seconds looking at advertisements. This is how designers can get people to buy the product they advertise. You need to make sure your layout is functional. However, it's also important to see if the product can be used in real life. You can test it using our mockups. This will not only help you but also your client. It will also look great in your portfolio.

### AFFECTIVELY TO THE PURCHASE

An interactive pdf will be sent to you with the link to the mockups.

### HOW TO USE

Double-click on a layer, and then paste your iso A/B/C image.
