It is crucial to have all the necessary tools to make an expedition successful.

Archipelago Xpedition is the perfect tool for any *Fujifilm photographer. It can be used wherever their journey may take them. The Xpedition presets combine the unique aesthetic of Fuji's iconic camera profiles with Archipelago's signature style.

Gfx plugin details of Archipelago – Xpedition Presets for Fuji Photographers (XMP)

The product is in **Photoshop category** , for more information about this post you can click on the home page link in the sidebar.

This collection includes 6 color presets using the Classic Chrome, Provia, and Astia Fujifilm profiles. There are also 3 black & White presets based upon the Fujifilm Monochrome profile. It is stylistically varied but cohesive.

The main set can be used with most Fujifilm cameras. However, the 'version 2" set can only be used with Fujifilm v2 cameras (such as the XT4).

Please Note: This set requires Adobe Lightroom Subscriptions: LR Classic CC (v7.5+), LR CC v1.3+, and/or Adobe Photoshop CR (v10.5+). After purchase, please refer to the included Install Guide to install the presets for Lightroom 7.5.

For the future, we must all be united. The Archipelago community was founded in the Pacific Northwest. It has since spread around the globe. Recognizing that growth comes with responsibility, we decided to return a portion to non-profits dedicated to protecting our planet and fighting for equality and social & race justice.
