Flexible Parallax Slideshow_Floating Text VH-19788192: Utilize these pre-made, customized, and well-synchronized templates. Setting up these projects requires minimal time. Insert an image and modify the text. You can also incorporate titles from other projects (with specific lessons on using text from other authors). The setup is straightforward and swift. Additionally, you can employ the universal project as a slideshow builder to make your presentation unique. Adjust the camera animation, slide duration, and transitions in all directions without using animated keys. A pop-up menu and sliders facilitate these settings, and I've provided a detailed tutorial on creating a custom project.
