

Break Into Motion: Creating a Personal Intro Animation

2025-02-10 17:06:43 [label](#) [我要反馈](#) [下载页面](#)

Do you want to include motion in your creative toolbox? Join animator and artist Chris George to learn how to create your own personal project to get started with animation.

In this de-mystifying and highly engaging class, Chris will guide you through the fundamentals to learn about After Effects by showing you how to design and create an initial animation. The class combines step-by-step instructions with demonstrations that are practical so you will get a better understanding of how the techniques are utilized. When you finish the class, you'll have knowledge about After Effects and a personal animation you can apply on the internet. Through this course, you'll be able to: how to:

- The text can be animated in three different ways
- Make a simple character design with the idea of movement in your the mind
- Mix text and images to create an eye-catching animation

More importantly, you'll get familiar with using After Effect's most important features such as Text Layers and Shape Layers Nulls, Masks Velocity, Effects, and Once you've mastered this fundamental then you'll be ready to begin your journey to animation and develop your motion graphics skills.

Instead of starting with design software such as Illustrator or Photoshop, This course lets you design as you go and is completed using After Effects. Beginning with the font and color choices, you'll be given the option of personalizing your work without creating a design from scratch.

Although the class is targeted at students who are new to animation, this class can be beneficial for intermediate animators seeking to improve their understanding of the software or gain insight into the professional workflow.
