TOP 15 Black and white wedding and portrait Lightroom Presets

This collection includes 15 of my favorite presets that I have been using for the last seven years while editing hundreds more portrait and wedding photos. These presets are based on film effects (mostly include grain). They have incredible white and black points for tone curve and film simulation and will help to achieve beautiful contrast in your work.

You can adjust the light conditions, exposure, contrast, and tone curve to your liking.

These presets are compatible with Lightroom 4 and 5.
