Roli Equator2 Granular Foley by Rozz3r Soundpack:

Craft extraordinary sonic landscapes with Granular Foley, a curated collection of samples meticulously processed through the extraordinary granular engine of Equator2. An essential choice for cinematic and atmospheric productions, this sound pack showcases field recordings of natural ambience, machinery, and radio chatter — skillfully transformed into alien textures, metallic hits, evocative tones, and peculiar organic instruments that transcend traditional categorization.

Included in the collection are 30 Standard presets and 30 MPE presets, offering a versatile array of sonic possibilities.
