Fox Particles For Cinema 4D R21-2025:

Fox Particles is a simplified, user-friendly alternative to Cinema 4D's Thinking Particles, designed for users unfamiliar with Xpresso.

Recent updates include essential bug fixes for improved functionality: FoxCache now supports group names with special characters and spaces, ensuring compatibility with Cinema 4D R26 (S26). Additionally, missing components in Fox Scene and FoxGroups, including "Fox Cover," load seamlessly, and issues with the Spline target feature in FoxCover have been resolved.
