keyboardFX is a program that works with Adobe After Effects, specifically designed to produce highly customized keyboards, as well as user-defined animations for typing.

It will save you a huge amount of time designing.

If you're looking to make an animated keyboard for your computer, this is the right tool!

Every keyboard is dynamically customizable. This gives the user the ability to design almost any kind of keyboard.

Gfx plugin details of Aescripts KeyboardFX v1.5

The product is in the **After Effects Plugins category from AeScripts**, for more information about this post you can click on the home page link in the sidebar.

To search for similar products to Aescripts KeyboardFX v1.5, **Does this product work on Windowns and Mac Os?** We mostly include the operating system in the title. if it is not written, it will work on Windows, and you can for the Mac version.

You can also opt to use the **Qwerty, Azerty, or Dvorak** keyboard layouts.

keyboardFX v1.5 introduces a new mode to help you better time your animations with markers!

For each character that is generated, **keyboardFX** creates a layer marker that controls the animation of typing and the illumination of keys.

keyboardFX v1.5 also introduces the "HOLD" special code, which provides the capability to illuminate the key combinations or even entire parts that comprise the keyboard.

There is a variety of animation presets available inside **KeyboardFX**. Here are some examples:

You can light all of the access keys on each keyboard including the Modifier, Function Numeric Pad, Navigation, and Function Keys
