Instagram Stories - It's used as an After Effects Template. Scenes are based on a Man/Woman working on a Laptop or Computer and other text.

A majority of elements can be made customizable and have full control over color. You can alter the hair Style, Clothing, and Accessories. The characters are fully rigged. If you're looking to change the animation, you can do this using already-designed controllers.

There are four pre-made scenes with different characters. Each Character can be customized to suit your specific needs.
