**Alphapixel – Poly Greeble v1.3 For C4D R15 – R26:** Poly Greeble is a plugin that instantly makes your mesh appear as an actual object that has details that are generated for every polygon. If you are looking for a technological futuristic vibe to your scene, you'll find no better plugin for the job than Poly Greeble. The plugin is currently in development, but it is available to pre-order now!

- The most efficient method to give your scene depth
- Create intricate meshes from any primitive or polygonal object
- Three different structural modes that you can alter the way you want to
- Interactive viewer for your Greeble objects
- Mix it up with random Variations of Everything
- Compatibility with Cinema4D R15-R26

### MASSIVE DETAIL AMOUNTS

Utilizing small models prebuilt hundreds of times in random order over your geometry, you can create an elegant look that would take hours to design otherwise.

### 3 levels of control

Utilizing the "Bases", "Panels" as well as "Antennas" tabs you can decide how much detail you'd like to have or turn off completely to get simpler appearance.

### SPEAK QUICKLY and CREATIVELY

If you're not happy with the design of one mesh, simply drop another mesh into the system and watch your settings be immediately applied.

### LIVE Viewer

Create your own Greebles and test them using the live viewer so that you can quickly select the information you'd like to add!
