# ZylBurner.NET v1.16 + CRACK

2025-04-11 20:31:33    label 我要反馈    下载页面

is a simple and easy-to-use .NET library for burning CDs, DVDs, and Blu-ray discs. It's designed for developers who want a quick solution to integrate disc writing functionality into their .NET applications. Built on NeroCmd, the utility requires Nero Burning ROM to be installed, and it is ideal for both basic and advanced disc-burning needs in a .NET environment.

The component supports two modes of operation: synchronous and asynchronous. In synchronous mode, functions such as Burn, Erase, BurnImage, and Eject wait for the operation to finish before returning a result. In asynchronous mode, the functions don't wait and return immediately, allowing the application to continue running other tasks while the burning process completes in the background.

The demo version is fully functional but includes a nag screen, which was removed from the licensed version. It comes with sample programs for both C# and VB.NET and works with various Visual Studio versions. **ZylBurner.NET** is fully compatible with a wide range of Windows operating systems and supports multiple versions of the .NET Framework, making it versatile for modern development.

## Key Features of **ZylBurner.NET** :

1. Disc burning support: You can easily burn data discs, audio CDs, video CDs, super video CDs, and video DVDs.
2. There are two operation modes: Synchronous mode waits for operations to finish, while asynchronous mode allows tasks to run in the background.
3. Simple integration: Written entirely in C# for seamless integration into .NET applications.
4. Wide compatibility: Works with Windows XP to Windows 11 and supports .NET Framework versions 2.0 to 8.0.
5. Fully functional demo: Includes demo programs in C# and VB.NET for Visual Studio versions from 2010 to 2022, with a nag screen in the demo version.
6. Developer-friendly: Ideal for adding quick and efficient disc writing functionality into .NET projects.
