Mobile App Website Promotion VH-20772517: Introducing "The Mobile App/Website Promotion," a sleek and elegant template featuring stop motion animation, perfect for showcasing your mobile app, website, or e-commerce platform effortlessly. Crafted in After Effects, this template comprises six independently usable scenes. No plugins are needed, and it includes three different promos for iOS and Android, as well as a combination of both using the latest iPhone X and Samsung S8 mockups.

- Stop motion animation style for a captivating presentation.
- Utilizes new mobile mockups for iPhone X and Samsung Galaxy S8.
- Three distinct promos: iOS devices, Android devices, and a blend of both.
- Effortlessly change colours across all scenes with expression control.
- Each scene can be used separately, with easy reordering options.
- Universal Expression compatibility with any After Effects language.
- No additional plugins are required for seamless editing.
- Simple customization of text and images.
- Well-organized template for easy navigation.
- Comprehensive documentation is provided via HTML and video tutorials with voiceover.
- Available in 4K-UHD resolution for high-quality visuals.
