FL Studio PRO Gartist Library By BLVCK COBRV (WAV):

Over 250 one-shot and loop samples from genres

G-HOUSE | SLAP HOUSE | MID-TEMPO | TRAP

What is the G-ARTist Library is:

It includes both well-known styles of sounds (universally working music) as well as unique hybrid options that can help genres advance.

Every sample or loop is tested within the working mix of the genre chosen in order to determine if it "sits" in it (it was crucial to me to take this into consideration in conjunction with "non-standard hybrid solutions"

This is quite logical it is the case that the quality and selection of all samples ought to be far more than high but also the best.

Contains:
