Apitron PDF Rasterizer SDK for .Net v.3.0.154

2024-12-27 08:31:20

Apitron PDF Rasterizer is a .NET element that performs high-quality conversion in the PDF file to a picture. It is 100% handled, does not have any third-party dependencies and harmonious with almost any .NET frame version currently in long-term assistance by Microsoft, and contains an easy and translucent royalty-free licensing model. Use your favorite .NET terminology, C#, VB.NET, or alternative to incorporate PDF processing in your internet, desktop, or mobile software.

Many export formats are supported: BMP, PNG, JPEG, EMF, WMF, TIFF. All PDF versions are encouraged; this element may also be utilized for cross-development being harmonious with MONO.

Raw color information can be acquired by exporting the picture information to a byte or integer array.

The newest version includes support for Windows8, Windows 10, WindowsPhone 10, Microsoft Silverlight, WinRT & Windows Phone 8.1, extending the API to export the WritableBitmap and raw information mentioned previously.

Apitron PDF Rasterizer SDK for .Net Great Features:

We encourage rendering of the PDF articles such as:

- Text (using embedded, externally linked, regular, simple, and composite fonts)
- Text search, highlighting, areas, and coordinates extraction (such as non-Latin alphabets)
