TypeMonkey3D 1.0 is an innovative add-on for After Effects that revolutionizes kinetic typography creation. By seamlessly integrating with TypeMonkey and AE2024, it enables the effortless transformation of TypeMonkey designs into captivating 3D types.

How to create dynamic 3D typography in After Effects?

You can use "Aescripts TypeMonkey3D" to achieve typography design.

Leveraging the power of AE2024's Advanced 3D Renderer, TypeMonkey3D offers preset lighting environments and textures, along with intuitive controls for real-time adjustments to geometry, materials, color, lighting, and more. This groundbreaking script simplifies the process of creating dynamic 3D typography, making it accessible to users of all skill levels.
