

DevExpress Universal Complete [.Net Components] v25.1.3 (02 Jul 2025) + Documentation + Patcher

2025-07-21 09:07:32 [label](#) [我要反馈](#) [下载页面](#)

DevExpress .Net Components is a set of UI controls for mobile, desktop, web, and BI reporting application developers. The controls include data grids, spreadsheet, rich text editor, diagram, charts, reports, and more. DevExpress also offers frameworks for building cross-platform apps, an ORM library for .NET applications, a Web API Service for building web APIs, and for Visual Studio to help developers write code more quickly and efficiently.

Elevate your applications to the pinnacle of user experience with DevExpress UI components, crafted to replicate the sophistication of today's leading business productivity tools. Whether crafting WinForms or WPF applications, DevExpress UI components empower you to deliver visually stunning, highly interactive interfaces that leave a lasting impression on your users.

Elevate your line-of-business web applications to new responsiveness, interactivity, and performance heights with DevExpress UI components tailored for Blazor, ASP.NET Core, ASP.NET Web Forms, and MVC frameworks.

You can download with the patcher and CRACK **FREE of CHARGE** from the links below; in the following picture, you can see all Devexpress Components were activated and licensed with our crack.

Key Features of DevExpress .Net Controls :

- Wide Range of Controls:** DevExpress offers a comprehensive library of UI controls, covering every aspect of application development, from data grids and charts to data editors and interactive widgets.
- Excellent Performance:** DevExpress controls are built for performance, ensuring smooth interaction and seamless data manipulation even with large datasets. They utilize advanced rendering technologies to optimize performance across various platforms.

- 3. **Customizable Themes:** DevExpress provides a vast collection of themes and skins, allowing you to tailor the look and feel of your applications to match your branding or specific requirements.
- 4. **Touch-Enabled Functionality:** DevExpress controls are optimized for touch devices, making them ideal for creating responsive and intuitive interfaces that seamlessly adapt to different screen sizes and input methods.
- 5. **Data Binding and Editing:** DevExpress controls seamlessly integrate with data sources and provide robust data binding capabilities, enabling you to easily connect your applications to data and implement efficient data editing features.
- 6. **Charts and Diagrams:** DevExpress offers a comprehensive suite of charting and diagramming tools, allowing you to visualize data in various formats and styles, including bar charts, line charts, pie charts, and diagrams.
- 7. **Spreadsheet Control:** The DevExpress XtraGrid control provides a fully featured spreadsheet experience, enabling you to perform complex data manipulations, conditional formatting, and pivot table operations within your applications.
- 8. **Rich Text Editor:** The DevExpress XRRichEdit control empowers you to create and edit rich text documents, including formatting, images, tables, and other rich content elements.
- 9. **Accessibility:** DevExpress controls adhere to accessibility standards, ensuring that your applications are accessible to users with disabilities, comply with regulations, and provide a more inclusive user experience.
- 10. **Cross-Platform Support:** DevExpress offers a variety of cross-platform components, allowing you to develop applications for Windows, Mac, iOS, and Android using a single codebase, ensuring a consistent user experience across devices.
