

DevRace FIBPlus v7.7.0 for XE7-D10.4 Sydney Full Source

2024-12-18 23:02:45 [label](#) [我要反馈](#) [下载页面](#)

FIBPlus is a library intended for developers of database software. Since the start of the creation of the product, Devrace desired to comply with their programmers' wants and wishes. The elements, methods, or possessions are there to fix problems and execute the most frequent tasks.

Employing FIBPlus on your software, you get several significant advantages, for example:
Supports all versions of InterBase beginning with 4.0, Firebird 1.0 (including Embedded Firebird)
Programs on FIBPlus do not require installation of additional applications (BDE drivers, ODBC, etc.) other than the customer server applications (gds32.dll, fbclient)

- Total support of current and future characteristics of Firebird and Interbase.
- The best execution for your Master-Detail of this mechanism.
- Control of elastic and simple transactions.
- Complete support for third-party applications.
- A high degree of functionality and real profitability.
- Characteristics of design programs and graphics editors.
- Allows visual information manipulation.
- Ideal and total relationship administration.
- Use together various versions of InterBase and Firebird, using different DLLs for every client connection.
- You now have complete control over resizing locally.
- The performance was enhanced in the case of the slowest connections (eg, modem)
