The Videohive Music Visualizer Pack V2 enhances screen displays with dynamic visuals, offering a cost-effective and time-saving solution through video templates.

How to design a video for YouTube using templates in After Effects?

You can use "Videohive Music Visualizer" to design your project.

This pack includes 24 visualizers optimized for various platforms like YouTube, Instagram, Facebook, TikTok, and more, in four resolutions: 1920×1080, 1080×1920, 1080×1350, and 1080×1080. It features well-organized layers, complete color control, and universalized expressions compatible with any After Effects language.

"Videohive Music Visualizer Pack" Samples:

The templates are fully customizable, require no plugins, and come with a video tutorial. Compatible with After Effects CS6 and higher, the pack is regularly updated with new visuals.

Package information

This After Effects project, last updated on May 15, 2020, and published on April 7, 2020, is compatible with After Effects versions CC and CS6. It includes After Effects project files, video files, and image files, and its resolution is resizable.
