Components   ASP.Net

.Net
 is a comprehensive exploration of the ASP.NET Core framework designed to equip learners with the essential skills for building dynamic web applications. Beginning with setting up the development environment and familiarizing with CLI tools, participants embark on a journey through the foundational components of ASP.NET Core. This includes understanding models, views, and controllers and integrating Entity Framework Core for seamless data persistence and manipulation.

As the course progresses, learners delve deeper into advanced topics such as view management, handling related data, and implementing robust authentication and authorization mechanisms. Through hands-on exercises and practical demonstrations, participants gain proficiency in crafting user-friendly interfaces and securing applications against unauthorized access. By the conclusion of the course, students emerge with a solid grasp of ASP.NET Core's capabilities and are empowered to leverage its features in their web development projects confidently.

Whether learners are novices to ASP.NET or seasoned developers looking to update their skills, the **ASP.NET Core Crash Course - Erik Dahl** offers a structured learning path that covers everything from basic concepts to advanced techniques. With Erik Dahl's expert guidance, participants gain a comprehensive understanding of ASP.NET Core and acquire the practical skills necessary to evaluate and utilize the framework effectively in real-world scenarios.

ASP.NET Core Crash Course Table of contents:

1. Course Overview (Duration: 1min)
2. Getting Ready (Duration: 24mins)
3. Adding Controllers, Views, and Models (Duration: 17mins)
4. Adding a Database (Duration: 35mins)
5. Working with Views (Duration: 18mins)
6. Adding Related Data (Duration: 28mins)
7. Adding Authentication and Authorization (Duration: 22mins)
8. Going Further (Duration: 4mins)
