I introduce you to my Real Estate Photography Presets Collection (Vol. 1)! This collection contains 20 presets that I created and specifically created for **property, outdoor, and indoor editing of photography**. The 20 presets were developed with the goal of illuminating your photographs straightforwardly and giving them the "professional touch." They are, therefore, ideal for any requirement, from traditional wood furniture images to lighter-colored environments with a simple and relaxing design. They also cover the exterior of houses and outdoor settings for both night and daytime.

What is the best presets collection for photographers, real estate agents, or anyone presenting properties visually?
