DxO FilmPack recreates the colors and grain of the iconic films as accurately as possible with a complete calibration process created in the company's labs. The program recreates the colors, saturation, contrast, and grain of authentic analog images within digital images. It also provides a unique way of browsing through the different photographic eras.

How do saturation and contrast?

You can use DxO FilmPack 6.14.0 Build 49 ELITE software.

Where can I download the product?

After subscription, You can download it for free from here.

To search for similar products to DxO FilmPack,

- **Rediscover the spirit of the legendary film stocks -** Select from 45 film stocks that set the standard for film production. Make stunning photos with vibrant red and intense blue tones using EKTACHROME Professional infrared EIR finish. Rediscover the beauty in Kodak Portra 160 NCR for portraits and the beauty of Polaroid or the vivid colors and contrast of Fujichrome Velvia 50 for macro photography.
- **Legendary film stocks in black and white -** Find out the highlights and grain of the most famous or vanishing film stocks like Kodak Tri-X, Fujifilm Neopan, Ilford FP4 Plus, and even Polaroid 664. DxO FilmPack helps you uncover your creative side by selecting 38 black-and-white film stocks. Using an IMPOSSIBLE PX 600 SILVER SHADE, you could recreate the look of Polaroid 600 by creating the pastel sepia appearance of the instant monochrome film.
- **Time Machine: Harnessing History to Fuel Your Imagination -** Version 6 offers an interactive, new, and exciting presentation of photography's history, looking at essential images from the past and discussing important events that shaped the evolution of photography.

What is DxO FilmPack?

"DxO FilmPack 6.14.0 Build 49 ELITE" is a software application for photo editing and post-processing. It was developed by DxO Labs, a company known for producing software and tools for photographers. Specifically, DxO FilmPack is known for its features related to simulating the look and feel of various analog film stocks.

DxO FilmPack is often used by photographers who want to achieve a specific vintage or filmic look in their digital photos. It provides a wide range of film emulation presets that mimic the characteristics of classic film stocks, allowing users to apply these effects to their digital images. Users can adjust settings like color, grain, contrast, and more to fine-tune the appearance of their photos.
