Zenhiser – Designer SFX: We've blurred the boundaries between sound FX and track SFX to create an assortment of samples for your media productions and tracks. These truly intricate sound effects come with a variety of powerful sounds, including disorienting atmospheres, shuddering downlighters, shivering impact, and massive uplifters. The creation process for each sound was meticulously thought out and thought through regarding how the library could be used in music production, sound design, television, radio, and movie production. We're incredibly pleased with the final product and are eager to try the FX sounds for your next project.

Gfx plugin details of Zenhiser – Designer SFX

The product is in the **SOUND EFFECTS category**, for more information about this post, you can click on the home page link in the sidebar.

- And so much more

We made sure to keep the demo for this pack straightforward, giving the SFX sounds like breathing and shining. Sometimes you will hear a hint of EDM; however, this is only to show how versatile the sounds are. As is the norm, all FX sounds are organized in proper folders and are available for use.

SAMPLE PACK Specifications

- Atmos - 65
- Downlighters 60 to 60
- Impacts 50 to 50
- Uplifters 60
