It is ideal for amateurs as well as professionals. It's great for both amateurs and professionals. Fantastic results on black and white images. To make your life simpler it is possible to add additional actions that can be used to select and overlay overlays that are accessible when you are in screen mode. This works in Photoshop along with Photoshop Elements. The Golden Hour overlays can be used with any graphic editor that can support layer overlays in the Screen mode.

In case you'd prefer to increase the intensity of your overlay, for example, for photos that are very light, change the blend setting in order to Linear Dodge (add)
