Blender Markert - Surface Painter v1.1.0

2025-02-10 16:48:32 label 我要反馈 下载页面

Blender Markert - Surface Painter:

Surface Painter is a Blender add-on designed to quickly add and customize basic, pre-colored materials to objects, ideal for both beginner and experienced users.

It offers 27 commonly-used surface types, such as car paint and wall plaster, and supports easy material application via a simple CTRL+LMB click-on object. Users can choose from 75 default colors or create custom ones, saving favorites for future projects.

The add-on enables quick tweaks directly in the panel without needing to enter the shader editor, and colors from Surface Painter can also be applied within the shader editor to any material. Compatible with Blender 3.0+ and up to 4.2, it supports Blender's sRGB color space and allows users to create and save custom surfaces, making material editing fast and efficient.
