This set of presets designed is designed for Adobe Lightroom to create a faded nostalgic look that drips with emotion. Like Tyler Durden's glassware, one is made by hand and unique.

I'm not joking. I create every batch of presets in the exact order, using a method that allows for infinite variations. Some of them will be amazing. Certain will be odd. Certain will touch your heart. They will all be unique to you and include your monogram on their names.

The vintage, faded style has amazing potential in photography. It can transform an accident photograph into art. It is possible to transform an instant into nostalgic memories. Photos are often associated by simply illustrating a fact. When you pick one of these presets you can capture the emotion.
