91Vocals Drill FM Vocal Wave (WAV): Tune into Drill FM: Vocal Wave and discover the dialed-in tunes with sharp vocal cuts and smooth 808s that work to create a new, super-playlist-busting Drill as well as Rap beats. Explore a wide selection of song starters that are radio-ready and melodic loops interspersed with original vocals, ghostly voices, and remixed toplines. Additionally, this collection includes an entire drum kit that includes unique drum one-shots and loops with percussive effects and counter snares, as well as 808s. The sound was created from scratch, designed to give punchy hits with a unique edge.

To search for similar products to 91Vocals Drill FM Vocal Wave (WAV),

As always, 91Vocals sets the foundations of sound by recording authentic vocals using a top-of-the-line chain to capture a precisely processed, equalized, and energetic vocal performance. We transformed and resampled these performances to create twisted vocal loops, ambient layers, and ear-candy shots. The slammed synths, lofi pianos, along with dark strings were mixed in to create distinctive musical stacks and inspire.

All loops are recorded and key-tagged to ensure that they are locked at 140 BPM. These royalty-free loops are great to add layers in UK Drill, ambient trap, and RnB or as distinct layering in EDM, as well as hard bass.
