Photoshop   平面设计

This collection includes 30 ACR-Presets for Adobe Photoshop (Adobe Camera Raw) that were specifically designed for Northern Lights Photography (Aurora Borealis).

The preset bundle includes 10 bases presets and two additional brightness variations ('Brighter' and 'Brightest'). This gives you a total of 30 presets to choose from. Each preset has a unique focus and approach. It's worth trying different presets to find the right one for you.

ACR-presets are designed to improve your landscape or nature photos quickly and easily. Each preset has been meticulously crafted and tested to be compatible with many images. While some presets can be subtle or more dramatic, all presets can be adjusted to fit your style of photography. Check out the preview images to see the quality and possibilities.

Each preset is intended to be used as a starting point. Some settings will need to be adjusted, including the Color Temperature and Blacks and Whites in the 'Basic" panel.

INSTALLATION

WINDOWS

1. Navigate to the following path in Explorer: C:/Users/USERNAME/AppData/Roaming/Adobe/CameraRaw/Settings
2. Camera Raw does not support folders so copy and paste the XML-files only.

MAC:

1. Navigate to the following path in the Finder: USERNAME/Library/Applications Support/Adobe/Camera R/Settings
2. Camera Raw does not support folders so copy and paste the XML-files only.

Please note: If you find the "Library" folder hidden, click "Go" on your Finder Toolbar. Next, click "Go to Folder...". Type "Library" into the search box. Then, copy and paste the XML-files only into the folder.
