Learn After Effects for eLearning: This course is specially made for trainers, instructors, instructional designers, trainers, or educators who want to master After Effects but find the difficulty too tricky. This course will assist you in creating professional and clean videos without manually keying all objects or drawing them by hand. We will concentrate on using several available tools to create the video instead of making things by hand. In this course, you will be able to perform the following:

- Create a composition
- Use tools you are familiar with.
- Utilize helpful plugins for speedier development.
- Analyze a script to determine the design
- Leverage resources for better design
- Create and encode the video to ensure it is ready for the final output

This is a beginning course designed for professionals working in education or working in the learning and development industry. Understanding After Effects can significantly increase your potential marketability. After Effects can be daunting initially, but this tutorial will focus on the most commonly employed features for creating your videos. Additionally, we will use a powerful plugin that will accelerate the process more.

When you complete this course, you can view a complete eLearning video example that you can include in your resume.

This class is not designed for people learning to create animated characters or cartoons. This is mainly meant for eLearning or training.
