Blender Market - Zip Merge: Introducing Zip Merge, the perfect addon for seamlessly merging complex geometry, just like a zipper! Whether you're dealing with issues from merging by distance or need to preserve UVs while avoiding bridging faces, Zip Merge has got you covered.

This addon is handy for merging seams on clothing or dealing with intricate geometry where traditional methods might fall short. Instead of merging unwanted components or destroying UVs with bridging faces, Zip Merge offers a solution that preserves your model's integrity.

Here's how it works:

- Select a few vertices between your mesh islands (minimum of 3).
- Choose the start vertex and run the ZipMerge operator under the merge menu.
- Set the desired number of iterations, and ZipMerge will seamlessly merge your geometry, just like closing a zipper.

Say goodbye to tedious manual adjustments and hello to a smoother, more efficient workflow with Zip Merge. Try it out and experience the difference it can make in your modeling process.
