Simple Tree Tools for Houdini Indie:

Simple Tree Tools for Houdini is a comprehensive set of procedural tree modeling tools designed to create realistic trees, foliage, and plant animations with ease. It offers a variety of powerful features, including trunk and branch creation, leaf scattering with wind animations, and tools for generating and deforming geometry along tree curves. Additional tools support tree growth animations, natural wind simulation, and advanced mesh creation with customizable cross-sections. The package also includes features for seamless blending of branch intersections, efficient scatter management, and integration with Houdini's Pivot Painter tool.
