

Blender Market – Easeam – An Easy And Quick Way To Marking Seam (Uv Unwrap Tools)
v1.1

2025-02-10 16:51:03 [label](#) [我要反馈](#) [下载页面](#)

Blender Market – Easeam: This extension will speed up unwrapping, particularly when marking seams.

Tips:

- Every part of the add-on's interface has an explanation tooltip. If you're unsure what it does, move your mouse over it.
- If you intend to utilize these tools frequently, I suggest assigning a "Shortcut" to another operator that you wish to assign
- It would be best if you right-clicked the button you wish to assign to accomplish this.
- If you're comfortable enough about this add-on, you can hide the N panel from the add-on's preferences and then access the add-on via shortcuts you've assigned or the pie menu

New Changes:

- [Added] Redo panel on the "Re-Unwrap" operator
- [FixedFixed] minor issue
- Restart the blender after updating this add-on
- **Mark Around Flat**
- Edge seam markings around connected flat surfaces can be set with an angle and can be used to increase the range of options.
- You may also mark on the selection faces setting both values to 0
- Also, it is possible to automate unwrapped without "Live Unwarp" (Enable "U" icon)
- It wouldn't be a problem crossing over UV island.
- **Seam Edge Loop**
- Choose Edge Loop and mark the seam
- capable of auto-unwrapping ("U" symbol) and between seams marked with Live unwrap disabled
- Don't you think that crossing the edges has already marked the seam?
- **Tube seam**
- Auto-add seams to the geometry of the cylinder
- Geometry should be free of contamination (Quad Based)
- **Auto Unwrap & Seam**
- Auto unwrap and mark seams using the built-in "Smart UV Project" operator.
- If the target has edge seams, it will be replaced.
- **[New] Seam by Sharp Edge**
- Marking seams by marking edges or angles
- **Re-Unwarp**
- Unwrap the entire mesh (including hidden geometry)
- Keep up with the latest selection.
