### Aescripts One Click Export:

This tool simplifies sequence exports with up to 28 customizable render buttons, compatible with Adobe Premiere and Media Encoder. Key features include automatic folder opening after rendering and the ability to organize exports into project subfolders. It lets users export all or selected sequences, choose the export location, and customize file names with date, time, or labels. The tool offers nearly 600 export presets and seven single-frame export options. Users can also add custom .epr files and quickly export with just one click.
