SOUND EFFECTS

平面设计

6FX also includes

Density

Density utilizes our granular technology that transforms one sound into smaller and big ensembles by using multiple layers.

Gfx plugin details of Sound Particles 6FX BUNDLE

The product is in the **SOUND EFFECTS category**, for more information about this post you can click on the home page link in the sidebar.
To search for similar products to Sound Particles 6FX BUNDLE,

Space Controller Studio

Space Controller makes use of your smartphone as a motion reader and then pans the sound depending on where you're pointed.

Lightness Panner

Brightness Panner makes use of the frequencies of sound to make them move around you.

Energy Panner

Energy Panner uses the intensity of sound to regulate its movements without any effort or extra routing.

Doppler

Doppler is the ideal instrument to mimic the physical behavior of sound that is passing in the air. Make use of it with any DAW.

Air

Air is the best instrument to simulate distance using attenuation of frequencies that are high. It can be used with any DAW.
