Globe Plants – Bundle 31 – Alaskan Plants: Globe Plants' Bundle 31 contains 15 3D trees and plants for gardens, sceneries, and general landscaping, specifically for Alaska, with 84 distinct photos of high-quality 3D models of plants with a variety of forms that can be used in most of your scenes. 3DS MAX BLENDER, CINEMA 4D, and SKETCHUP formats allow you to make the slightest effort to import and render your scenes or projects; with the GrowFX formats, you have unlimited flexibility to modify the plants however you'd like.

The models were created in the most detailed way and accurately represented species used in Corona Renderer, VRay Renderer, and FStorm Renderer in 3D Max.

Our FBX file format contains all textures ready to be imported into other programs.

Our SketchUp file type is compatible with three rendering engines: VRay, Thea, and Enscape, including proxy files. SketchUp Files are completely capable of being used with Skatter. VRay 5 is compatible.

Users can choose Blender using Cycles and Cinema 4D with VRay 3.6 and Corona Renderer.

The models we use for the MESH model require 3D Max 2018 or above and a minimum of Corona 3.0, VRay 3.6, and Form 1.35. We also offer the complete Forest Pack library for all three renderers.

List of Species:

- Abies Balsamea 'Nana'
- Chamaecyparis obtusa
- Calluna Vulgaris

- Daphne Cneorum
- Empetrum nigrum
- Juniperus Sabina
- Ledum decumbens
- Picea Breweriana
- Pseudotsuga Menziesii XXXXXXX
- Salix Purpurea
- Salix Tristis
- Sorbaria sorbifolia
- Spiraea douglasii
- Tsuga Heterophylla
- Tsuga Mertensiana
