LUTS   Lightroom

平面设计

This LUTS PACK contains 10 Original cinematic LUTS made by myself. Each of the footages is taken by Slog2 along with Slog3 using SONY A7III.

It functions on both the S-log2 and S-log3 regardless of which Sony Camera you're using. Should you use other cameras which also Offer LOG Picture, it functions also. In Addition, It works on almost any editing applications, Which takes 3D LUT, for example, FCPX, PR, DR, PS, and LR.

So as to get the best outcome in my luts, I tremendously Urge you can fix the setting like mine and require a tool, color finale Or something else, to correct"Lift" Gamma" and"Gain"

- Camera | A7III
- Lens | 16-35mm F4 ZA , 55mm F1.8 ZA
- Gimbal | Zhiyun Crane V2
- Edit | Final cut pro X
- Placing | S-log2&3, S-Gamut3. Cine, Vulnerability (+2)
