COLOR

Our signature preset is the result of decades of fine-tuning and tweaking every little detail to perfection. Blacks are Deepened, highlights are all organic but softened skin tones and color Saturation/hues are thoroughly balanced to complement one another, and Shades are given an earthy heat. Ultimately, a delicate and subtle filmic touch is Applied to the full picture to take any remaining digital border.

Hint: To the best possible skin tones, then correct the white Balance to neutral or slightly to the warmer side.

MONO

Modern, natural, classic, and designed to accommodate any lighting situation. Our one and only white and black used for improving the Effect of the psychological and romantic moment or to get that gorgeous close-up portrait. Depth is inserted into the shadows while highlights stay natural but Softened along with also a subtle 'filmic' signature is added to the whole picture.

MODIFIERS:

- BLACKS DEEPEN: For incorporating More punch into the blacks
- BLACKS LIFT: To get a more Faded, milky appearance.
