Portrait Collection Portrait Collection contains **15 Lightroom presets** to use with Adobe Lightroom, Desktop & Mobile and is optimized to give a natural, delicate color balance, with distinct tonal styles.

My portrait presets are created to preserve natural skin tones while adding a unique cinematic style to your photos.

I've designed these presets to work with RAW files taken from Canon, Sony, Nikon, and Fuji cameras. I've tested the presets with a variety of mobile camera RAW files.

These presets can accelerate the workflow of **your workflow in** Lightroom and serve as a basis to alter your edits. They also provide a great method of learning how to edit. You can work backward from the preset I used to comprehend the method I've applied to my process.

This pack includes:

- 15 Portrait Presets
