Blender Market

Blender Market - Trowel - The Ultimate Brick Wall Generator:

The trowel is a comprehensive brick wall generation add-on for Blender that enables users to effortlessly create and customize brick walls, ruins, and intricate architectural structures.

Designed for both beginners and experts, Trowel leverages over 1500 custom-built nodes to automate complex tasks, allowing users to focus on creativity. It offers a streamlined, intuitive interface within Blender's Geometry Nodes and includes an array of tools, presets, and modifiers that make the creation of realistic, visually appealing brick structures simple and efficient. With memory-efficient instancing and advanced masking options, Trowel adapts seamlessly to varied project demands, empowering users to transform their scenes with ease.

- **Brick Presets**: Access 17 predefined brick sizes based on international standards or create custom brick sets with a single click.
- **Diverse Brick Bonds**: Choose from five common brick bond styles, including Stack, Running, Common, English, and Flemish, for versatile wall patterns.
- **Advanced Masking Tools**: Add realistic texture variations with Line Mask, Height Mask 1.2, Object Mask, Noise Mask, and Row Mask.
- **Powerful Modifiers**: Customize brick attributes with PosRotScale, Random Position, Random Rotation, Random Scale, 180-Degree Randomizer, Mortar, and Offset/Trim options.
- **Memory-Efficient Instancing**: Handle complex brick structures without performance issues, thanks to optimized instancing.
- **Seamless Blender Integration**: Built on Blender's Geometry Nodes, allowing full utilization of Geometry Nodes features.
- **Interactive Boolean Operations**: Easily create openings for doors and windows within brick walls.
- **User-Friendly Interface**: Access functions through Blender's N panel in 3D View and the Trowel menu in the Geometry Nodes Editor.
- **Beginner-Friendly and Expert-Ready**: Choose between automated workflows or manual adjustments for complete creative control.
- **Automatic Brick Sizing for Bonds**: Automatically generate brick sizes for complex bonds, simplifying the design process for intricate wall structures.
