NOIR / White and Black Actions

Photography was initially monochrome or black-and-white. Although the color film was widely available, photography in black and white prevailed for decades due to its cost-effectiveness and "classic" photographic look. It is important to remember that some monochromatic photos do not always have pure whites and blacks, but may contain different hues dependent on the method used.

Digital images that are full-color are processed with different methods to produce blacks and whites. Some makers make digital cameras that only shoot monochrome.

Renaissance / Vintage Actions

Retro and vintage styles will is never outdated. Photographers can create vintage effects on photos or photos is possible in a variety of ways. One way is by making use of specific filters and others use the vintage effects using Photoshop. The most straightforward way to accomplish this using Photoshop is via Photo Actions! Create a vintage or antique designs with interesting colors using any image.
