HUD UI Game Target 1 (VH 54908460) - AE Project:

The HUD Game UI is a specialized design package for the gaming industry, featuring a HUD interface and various UI elements, including one main HUD display screen. The HUD Medical Pack is carefully organized, with all primary screens and asset elements neatly grouped into folders for easy navigation and assembly. Built with After Effects shape layers, the vector-based components are fully customizable and scalable. Users can quickly modify the design's colors either globally or locally using a Smart Color Controller, ensuring flexibility and ease of use in creating high-quality, professional HUD designs.
